Licensing Actions for Radioactive Materials

During the second half of October 2020, the Department of State Health Services (Department) has taken actions regarding Licenses for the possession and use of radioactive materials as listed in the tables (in alphabetical order by location). The subheading "Location" indicates the city in which the radioactive material may be possessed and/or used. The location listing "Throughout TX [Texas]" indicates that the radioactive material may be used on a temporary basis at locations throughout the state.

In issuing new licenses and amending and renewing existing licenses, the Department's Business Filing and Verification Section has determined that the applicant has complied with the licensing requirements in Title 25 Texas Administrative Code (TAC), Chapter 289, for the noted action. In granting termination of licenses, the Department has determined that the licensee has complied with the applicable decommissioning requirements of 25 TAC, Chapter 289. In granting exemptions to the licensing requirements of Chapter 289, the Department has determined that the exemption is not prohibited by law and will not result in a significant risk to public health and safety and the environment.

A person affected by the actions published in this notice may request a hearing within 30 days of the publication date. A "person affected" is defined as a person who demonstrates that the person has suffered or will suffer actual injury or economic damage and, if the person is not a local government, is (a) a resident of a county, or a county adjacent to the county, in which radioactive material is or will be located, or (b) doing business or has a legal interest in land in the county or adjacent county. 25 TAC §289.205(b)(15); Health and Safety Code §401.003(15). Requests must be made in writing and should contain the words "hearing request," the name and address of the person affected by the agency action, the name and license number of the entity that is the subject of the hearing request, a brief statement of how the person is affected by the action what the requestor seeks as the outcome of the hearing, and the name and address of the attorney if the requestor is represented by an attorney. Send hearing requests by mail to: Hearing Request, Radiation Material Licensing, MC 2835, PO Box 149347, Austin, Texas 78714-9347, or by fax to: 512-834-6690, or by e-mail to: RAMlicensing@dshs.texas.gov.

Texas Board of Professional Engineers and Land Surveyors

Policy Advisory Request Regarding Scope of Public Works and Telephone Company Exemptions in the Texas Engineering Practice Act (Policy Advisory Opinion Request No. 53)

The Texas Board of Professional Engineers and Land Surveyors Policy Advisory Opinion Committee (Committee) met in public session on November 18, 2020, and approved this draft response for solicitation of public comment through the Texas Register and Board's website to the referenced request to your request, dated December 17, 2019. Any comments on this draft should be submitted to the Board no later than January 18, 2021, via U.S. Mail to Texas Board of Professional Engineers and Land Surveyors, Attn: Michael Sims; 1917 S. Interstate 35; Austin, Texas 78741-3702 or via e-mail to pao@pels.texas.gov

For the record, the request was originally submitted by Mr. David Magaña, P.E., previously employed with the City of Fort Worth.

Scenario:

The requestor seeks guidance on the following issue:

Do the operations of telephone companies who are Certified Telecommunications Providers (CTPs) that are installing fiber optic lines qualify for the exemptions for Public Works or Telephone Companies found in the Texas Engineering Practice Act (Act)?

Response:

The Policy Advisory Opinion process allows the Board to issue interpretations of the Act and Board Rules to address specific questions. The committee reviewed this request and determined that it can be answered by reference to the existing language of the statute and does not need to go through the Policy Advisory process.

Section 1001.003 of the Act defines the "practice of engineering" and the types of actions that fall under that definition. Further, Section 1001.004 of the Act establishes that "the privilege of practicing engineering be entrusted only to a person licensed and practicing under this chapter."

However, Subchapter B of the Act establishes certain exemptions for activities which may normally meet the definition of the practice of engineering. If the terms of an exemption, as laid out in the Act, are met the activity is exempt from having to be signed and sealed by a licensed professional engineer. Two of the exemptions found in Subchapter B deal with Public Works and Telephone Companies.

Specifically, Section 1001.053 discusses the exemption for Public Works, as copied below:

§ 1001.053. PUBLIC WORKS.

The following work is exempt from this chapter:

(1) a public work that involves electrical or mechanical engineering, if the contemplated expense for the completed project is $8,000 or less; or

(2) a public work that does not involve electrical or mechanical engineering, if the

(3) contemplated expense for the completed project is $20,000 or less; or

(4) road maintenance or improvement undertaken by the commissioners court of a county.

While "public works" is not specifically defined in the Act, the Board interprets "public works" to be consistent with accepted definitions, such as one found in §15.602(11) of the Texas Water Code, which defines a public works as "any project to acquire, construct, improve, repair, or otherwise provide any buildings, structures, facilities, equipment, or other real or personal property or improvements designed for public use, protection, or enjoyment undertaken by a political subdivision and paid for, in whole or in part, out of public funds." As such, the activities of a privately-owned telephone company would not qualify for a Public Works exemption under the Act.

Section 1001.061 of the Act discusses exemptions for Telephone Companies, as copied below:

§ 1001.061. TELEPHONE COMPANIES.

An operating telephone company, an affiliate of the company, or an employee of the company or affiliate is exempt from this chapter with respect to any plan, design, specification, or service that relates strictly to the science and art of telephony.

This exemption includes the use of a job title or personnel classification by a person included under Subsection (a) if the person does not use:

(1) the title or classification in connection with an offer to the public to perform engineering services; and

(2) a name, title, or word that tends to convey the impression that a person not licensed under this chapter is offering to the public to perform engineering services.

The Act does not specifically define "plan, design, specification, or service that relates strictly to the science and art of telephony." However, in your request you declare the company in question is a "certificated telecommunications provider." Texas Government Code 283.002(2) and 16 Texas Administrative Code §26.461(c)(2) define a certificated telecommunications provider as "a person who has been issued a certificate of convenience and necessity, certificate of operating authority, or service provider certificate of operating authority by the commission to offer local exchange telephone service or a person who provides voice service." Based on this definition, the Board would consider a certificated telecommunication provider to be a "telephone company" under Section 1001.061 of the Act. The Board further recognizes the evolution of telecommunications technology and services and interprets Section 1001.061 of the Act to include fiber optic or other technologies that provide voice transmission. As such, the design of fiber optic cable systems that will provide voice service by a telephone company would fall under the exemption allowed by Section 1001.061.

Requirements for installation and coordination of other utilities within a Right of Way (ROW) managed by the municipality could be added to local ordinances or the franchise agreement between the telecommunications company and the municipality. If the ROW manager requires signed and sealed design documents as part of their codes, ordinances, permitting process, franchise agreement, or other design requirements,

then the professional engineer must follow the practice requirements of the Texas Engineering Practice Act and board rules.

However, please keep in mind that if municipalities implement a requirement within their own codes, ordinances, permitting process, franchise agreement, or other design requirements for installation of these systems as ROW managers, they must not be less restrictive than the requirements in the Act or Board rules. As long as these codes, ordinances, or requirements are not less restrictive than the requirements in the Act or Board rules, the Board would have no additional jurisdiction over the content or enforcement of these codes, ordinances, or requirements that regulate installation of the systems.

Conclusion:

No new Policy Advisory Opinion will be developed for this request.

Policy Advisory Request Regarding the Ability to Sign and Seal Modifiable Electronic Engineering Plans ((Policy Advisory Opinion Request No. 50)

The Texas Board of Professional Engineers and Land Surveyors Policy Advisory Opinion Committee (Committee) met in public session on November 18, 2020, and approved this draft response for solicitation of public comment through the Texas Register and Board's website to the referenced request dated February 25, 2019. Any comments on this draft should be submitted to the Board no later than January 18, 2020, via U.S. Mail to Texas Board of Professional Engineers and Land Surveyors, Attn: Michael Sims; 1917 S. Interstate 35; Austin, Texas 78741-3702 or via e-mail to pao@pels.texas.gov

Request:

Mr. Guillermo Guerrero, P.E. with Burns & McDonnell seeks guidance on the following issues:

Does the Board consider digital model-based systems as a form of electronic engineering work?

Can a digital model-based system be used to replace in its entirety, or supplement in part, a paper-based system?

For digital model-based systems, can sealing requirements be satisfied by sealing the Transmittal sheet used to transmit the model?

Background:

The Policy Advisory Opinion process allows the Board to issue interpretations of the Texas Engineering Practice Act (the Act) and Board Rules to address specific questions. Consistent with the requirements of the Texas Engineering Practice Act, Subchapter M, relating to Advisory Opinions, the Committee reviewed this request and determined to accept it as Policy Advisory Opinion on May 23, 2019. The Committee directed Board staff to further study the issues in the request and form a workgroup to gather stakeholder input. The workgroup consisted of approximately 20 individuals and met three times in January, July, and November 2020. Based on feedback from the workgroup, the following response is proposed.

Response:

The answer to the first two questions is addressed in the Act. The Board does consider digital model-based systems to fall under the definition of the practice of engineering as found in Section 1001.003 of the Act, relating to the Practice of Engineering. Since the Act is silent on the exact format engineering work takes, a digital model-based system is an acceptable method to transmit engineering work, as is a paper-based system. Digital models should be signed and sealed as any other engineering work should be.

The third question is not clearly addressed by the Act or Board rules. The current signing and sealing rules were written with traditional paper or PDF type files in mind, not a large electronic file or digital model. The current rules do not specifically address the methodology to seal a large, modifiable file or set of files. The Board recognizes that there are many electronic programs or packages used to generate models, files, or other digital engineering work and that technology changes very quickly. It is also not the role of the Board to endorse or require any specific software package or vendor as part of its rules or policies. Therefore, the Board offers the following performance standards to consider when sealing and transmitting a large electronic file.

When transmitting a file or software package as the engineering work product, the engineer shall ensure the file meets the following criteria, each of which will be discussed in more detail below:

The design professional's identity is clearly indicated and confirmable.

The version of the file being sealed is identified and saved.

All responsible parties and design professionals are clearly identified.

Consideration has been given to address tracking of modifications.

The Design Professional's Identity is Indicated and Confirmable

The purpose of an engineer's signature and seal is to convey to all parties that the work product is final, compliant with all applicable regulations and codes, and has been created in a manner consistent with generally accepted principles of the engineering profession. Further, the signature and seal communicates that the sealed work product was done either by the sealing engineer or under his or her direct supervision. Lastly, the engineer's seal provides a unique identifier that allows interested parties to identify and locate the design professional when needed. Ideally, the signature and seal will be embedded somewhere in the electronic file itself. However, we understand that such a process may not be readily available with many engineering design software packages. If you are unable to embed a seal and signature, a transmittal sheet that is signed and sealed that notates the unique version of the model that is being sealed is an acceptable alternative until such time the software allows the embedding of seal and signature.

Version Control

If you decide to transmit an electronic file as your engineering work product, care must be taken to be able to readily identify the exact version of the file that is being signed and sealed. Possible methods to identify the signed and sealed version include notating the date and time the sealed file was saved, the file size, a unique version number or through other security methods including hashing or block chain. By identifying the version that was signed and sealed, the responsible design professional can clearly identify any subsequent changes to the file that were not part of the signed and sealed version. Any engineering modifications after the signed and sealed version would not be considered official unless they are signed and sealed by a licensed professional engineer. Further, if an unlicensed person made modifications and tried to reissue the file, it would be identifiable, and the Board could investigate the matter for the potential unlicensed practice of engineering. Lastly, a copy of the signed and sealed version should be maintained by the responsible party to address any complaints or compliance questions.

Responsible Parties

If multiple design professionals work on a project that is transmitted as an electronic file, the identity of the design professional and which part of the design he or she responsible for should be indicated and embedded in the file. Similar to the seal and signature, if the software does not allow this information to be directly embedded in the electronic file, it can be captured on a transmittal memo until such time the software allows for the embedding of this information.

Modification Tracking

The electronic file and software should be capable of tracking modifications or indicating that changes have been made to the original work product. If a change has been made, subsequent design professionals would need to either sign and seal the modifications, or if the revisions necessitated changes outside of his or her area of expertise, to notify the original design professional to review the changes. An example of this circumstance is an electrical engineer needing to make a tweak to his or her design that would necessitate a structural design of the building to accommodate the design. If the electrical engineer does not have the expertise to evaluate the structural change, the structural engineer who originally signed and sealed the design would need to review the change.

Summary

The Board recognizes that technology evolves quickly and as a result, the method of transmitting engineering designs is also evolving. This Policy Advisory is intended to provide guidance to professional engineers that wish to transmit their work through electronic files. The Board will continue to monitor technological advances and will update this guidance as needed.

Notice of Intent to Implement a Minor Rate Change Under 16 Texas Administrative Code (TAC) §26.171

Notice is given to the public of an application filed with the Public Utility Commission of Texas (Commission) on December 2, 2020, to implement a minor rate change under 16 TAC §26.171.

Tariff Control Title and Number: Application of Industry Telephone Company for Approval of a Minor Rate Change Under 16 TAC §26.171, Tariff Control Number 51573.

The Application: On December 2, 2020, Industry Telephone Company (Industry) filed an application with the Commission for approval to increase residential and business monthly access line rates and discontinue billing the current monthly interstate Access Recovery Charge (ARC) for residential customers. The currently tariffed ARC rate is $3.00 for residential customers. Business customers will continue to pay the $3.00 business ARC rate. Industry proposed an effective date of January 1, 2021. The estimated net increase to Industry's total regulated intrastate gross annual revenues due to the proposed increase is $76,230.

If the Commission receives a complaint(s) relating to this proposal signed by 5% or more of the local service customers to which this proposal applies by January 4, 2021, the application will be docketed. The 5% threshold is calculated using total number of affected customers as of the calendar month preceding the Commission's receipt of the complaint(s). As of December 2, 2020, the 5% threshold equals approximately 85 customers.

Persons wishing to comment on this application should contact the Public Utility Commission of Texas by January 15, 2020. Requests to intervene should be filed with the Commission's Filing Clerk at P.O. Box 13326, Austin, Texas 78711-3326, or you may call the Commission at (512) 936-7120 or toll-free (800) 735-2989.
